The most attractive part of the visit for the young people was the simulation of administrative case-law by the assistance of judges from the ACSC. The students put on gowns of judges and prosecutors and their colleagues played the role of parties of argue and procedural representatives.

During the simulative case-law was examined a case submitted to the Court on a claim set up on the Act on the Liability Incurred by the State and Municipals for Damages against the Municipal Directorate of Internal Affairs. The judge Tsvetan Lyubchev, second year student from the Law Faculty upheld the action for material damages by unlawful decree and awarded damages in the amount of 900 BGN – lawyer's remuneration paid in the proceedings on appeal and quash of administrative sanction for violation of the Road Traffic Act.
