

International Conference on The Common European Law about Sales

On October, 19th and 20th, 2012 at the UNWE was carried out an International Conference on the Common European Law about Sales. The purpose of the Forum was the discussion of a project for regulations of the European Parliament and the European Union Council for Common European Rights about Sales. In the project is suggested a dispositive (optional) legal framework about sales to be allowed the application of uniform European general rules at a will of the parties to the transaction. Benefits form such a common law are associated primarily with the unification of the economic and judicial practice and convergence of the EU member-states law in such a field of the law where in spite of the national specifics it is possible to be achieved a uniform regime.

Participants in the Conference

The Conference was organized by the University of Trier, under the guidance of Prof. Thomas R fner, within the framework of the initiative University of the Large Region by the participation of UNWE, the Legal Faculty and the Inter-University Center for Study of the Roman Law and Romanesque Tradition. In the conference participated approved and young researchers from several countries – Belgium, Bulgaria, Germany, Luxembourg, Norway and Romania. They discussed the issues of the current common law and the relevant national specifics.
