

The Rector and Two Ministers Presented The Project E-Campus

For the first time at the Large Conference Hall of the university was presented the platform E-Campus. At the presentation attended the Minister of Education, Youth and Science Corr. Mbr. Nikolay Miloshev, the Minister of the Electronic Government Development Roman Vasilev and the Rector of UNWE Prof. D.Sc. (Econ.) Statty Stattev.

It is the Bulgarian university which in the recent years has realized an entire policy of computerization in the academic, scientific, research and administrative activity, pointed out the Rector Prof. D.Sc. (Econ.) Statty Stattev the indisputable reasons of UNWE for being a host of the event. He outlined what had been implemented in details: the introduction of electronic admission of prospective students as well as electronic semester and state exams, the work of e-library, the free access of all lecturers and students to the largest e-databases, etc. Our students – Bachelors and Masters of Science have an electronic record from many years and now all examination results are sent in the system web-student. All students can receive their electronic grades in a real time and then they are sent to their electronic records forming an Electronic General Book, pointed out the Rector.

The purpose of our meeting is to present the development of the project E-Campus which concerns all students in Bulgaria, said Prof. D.Sc. (Econ.) Valentine Kisimov, Vice-Rector on Electronic Organization of UNWE. The project collects at one place all available electronic services for students and unites academic internet spaces as the platform E-Campus gives an opportunity of students to use and personalize the electronic services necessary to them. The platform campus.egov.bg is based on existing solutions. It gives an opportunity of students and lecturers to use and personalize electronic services, to participate actively in the newly creating online community, to test and develop electronic services which they consider as important and necessary, outlined Roman Vasilev, Minister of the Electronic Government Development. "The integrated access point will help for the rapid development of new models of communication, will raise the personal competitiveness and will create a valuable electronic content", pointed out the Minister.

During the meeting

Bulgarian students are the elite of the nation. Placing them at the center of such a platform is justified and logical. The benefits for students are not limited only to the services and free internet. Participating in various sections of the platform they will receive attractive bonuses and acquisitions such as free online tutoring, access to different information and educational resources, participation as moderators in various forums, outlined Corr. Mbr. Prof. Nikolay Miloshev, Minister of Education, Youth and Science. The portal will also serve for lecturers to present their programs, schedules and events, to publish actual news and communicate with the students. Help it become more improved to use it more effectively, urged the attendants the Minister Miloshev.

Orlin Kuzov (on the left) is presenting the projects of the Ministry.

In the platform are integrated also two important projects of the Ministry of Education, Youth and Science – the one is entitled Students Scholarships and the other is - Students Practices. Both projects were presented by Orlin Kuzov, Director of the Information and Communication Technologies Directorate to the same Ministry.

At the event at the Large Conference Hall of the university attended the Rectors Managing Body of UNWE, lecturers, students and journalists.
