

# Green Vision.

The project is led by the students of FU:

Antrushina Darina  
Gorchakova Anastasia  
Ivankova Varvara  
Petrushkina Ekaterina

# Our project

The project is suggested to provide new ways on improving the eco-friendliness of the Financial University by implementation green activities.

## Goal

To implement principles and activities of green policy in FU, as well as raise ecological awareness among students during 2019-2022.

## Objectives

To develop criteria for estimation of the green policy of the university

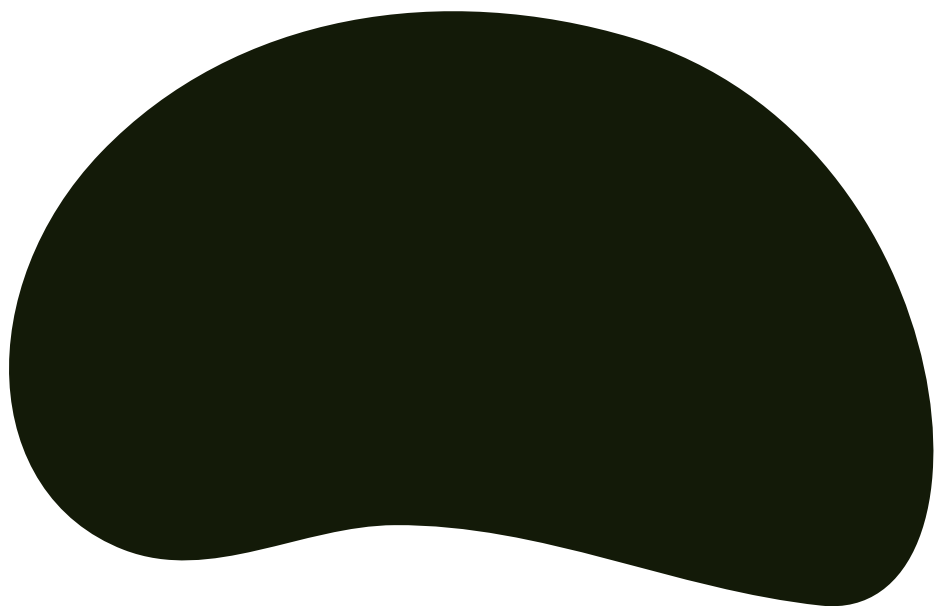

To suggest recommendations for improvement of the green policy of the universities

To implement some (or all) of the recommendations in the FU

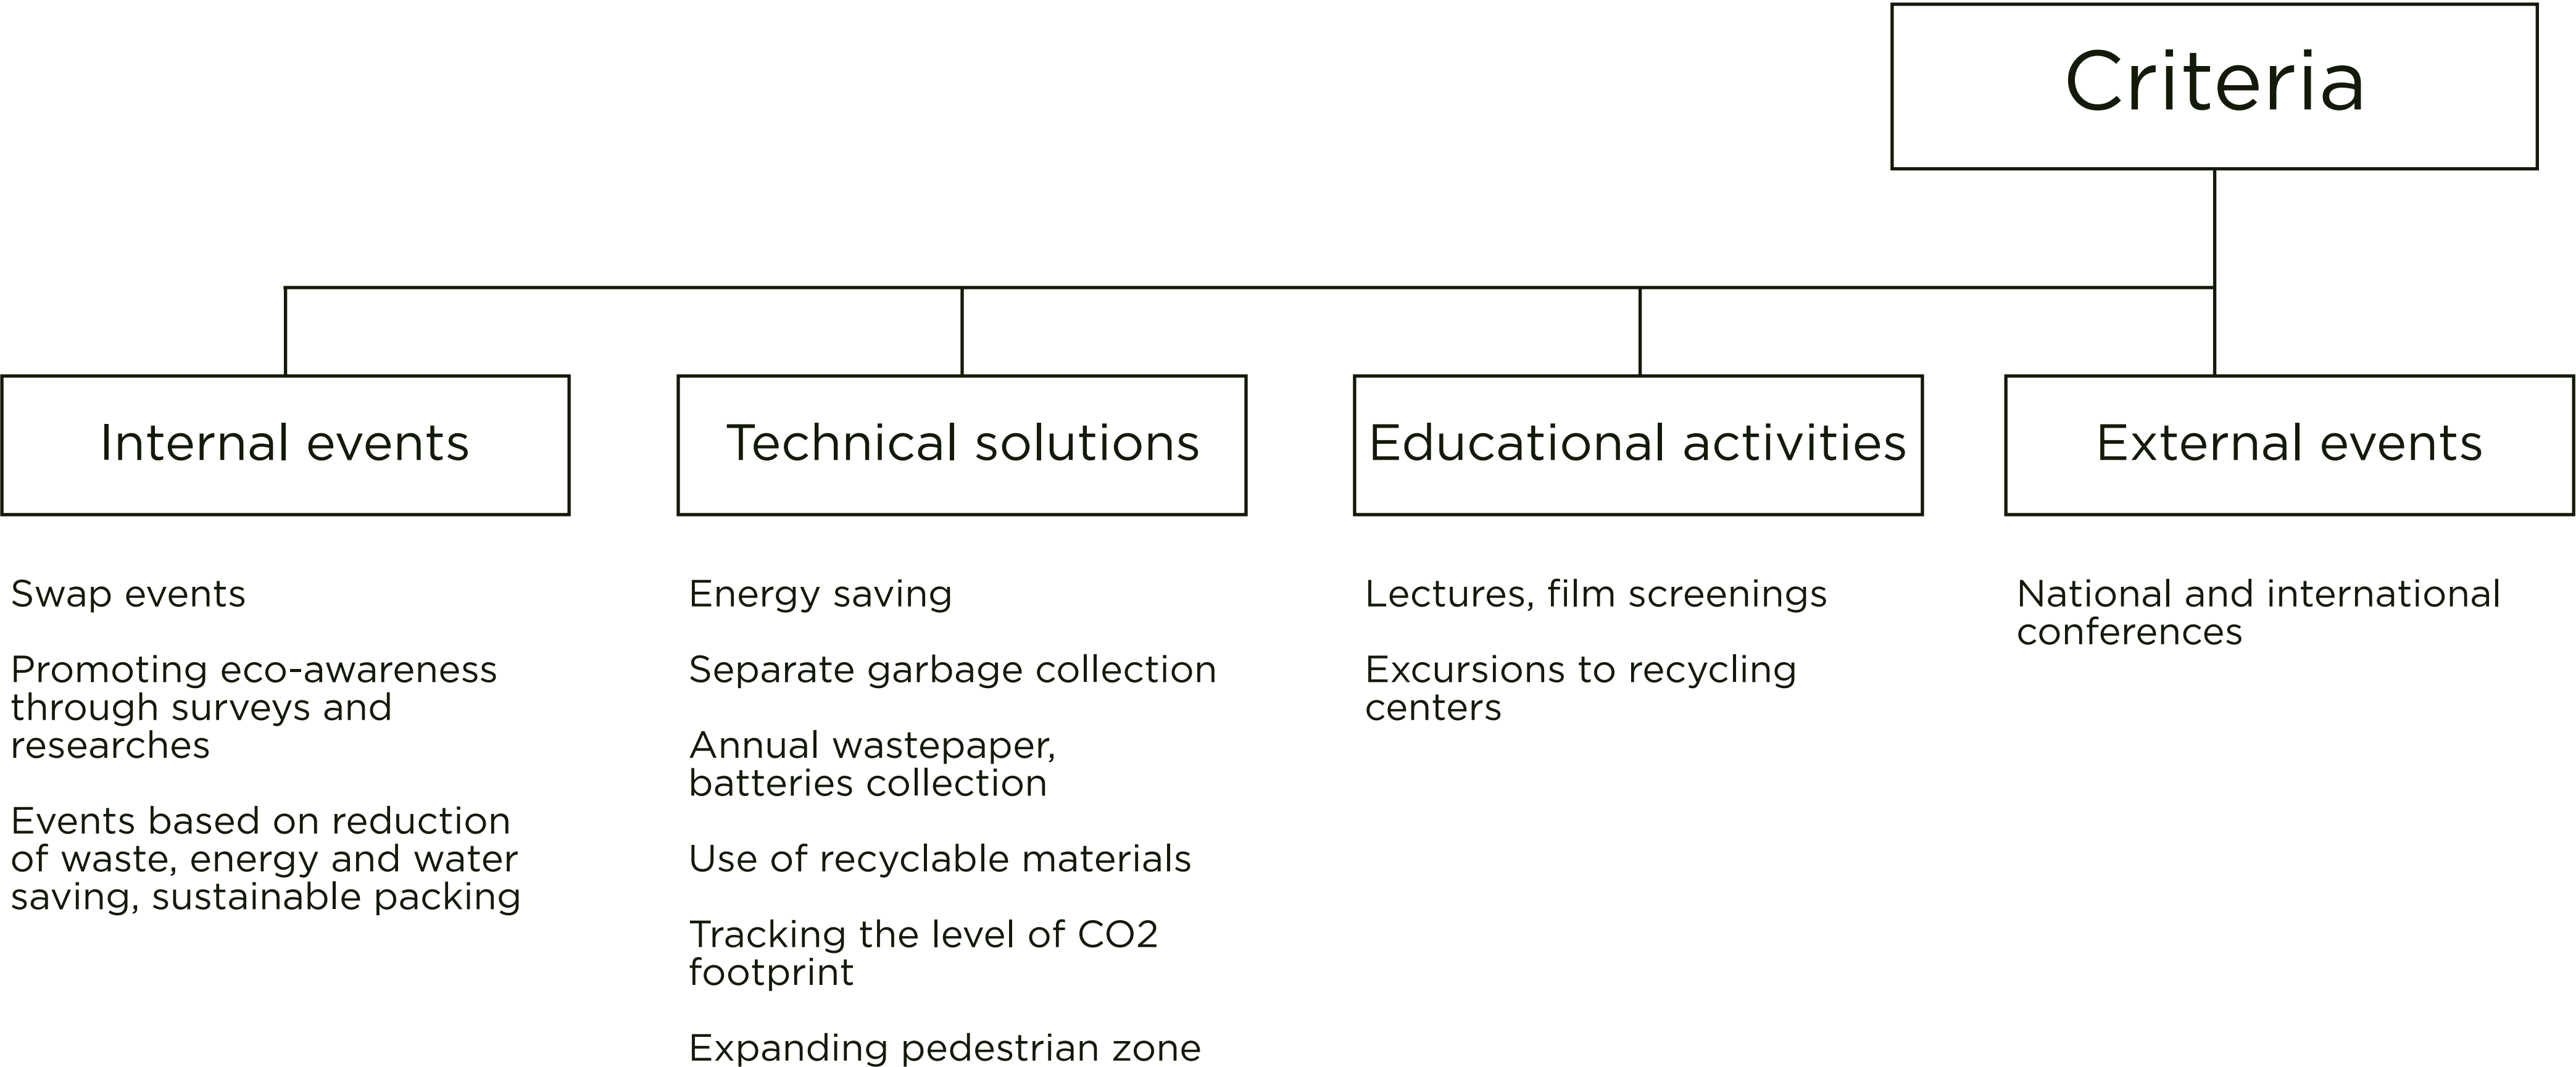

# Inspiration

Our project is based on the concept of sustainable development. Sustainable development is defined as development that meets the needs of the present without compromising the ability of future generation to meet their own needs.

However, we have narrowed the scope of the project to the implementation of eco-friendliness. We have analyzed «green policies» of different universities and got these criteria:

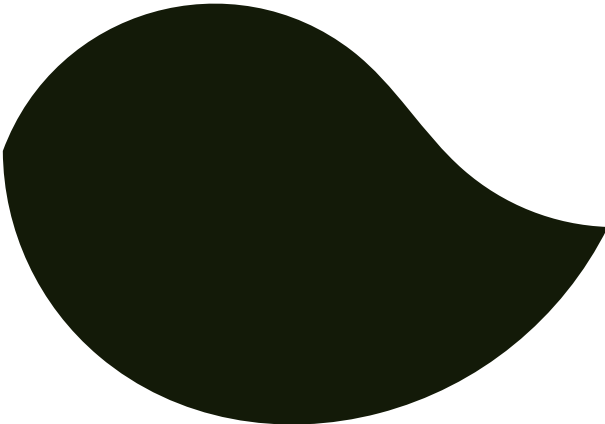

# The usage of the criteria

Having applied the criteria we identified the extent of “green” activity of the Russian universities and drew a conclusion about the green policy situation in the Financial University.

	HSE	MIPT	FU
Internal events			
Surveys and research activities, promoting eco-awareness	+	+	
Swap events		+	
Events or activities based on the reduction of waste, reduction of energy, saving water and sustainable packaging	+	+	
Technical solutions			
Existence of “green” organization	+	+	+
Energy saving			
Separate garbage collection	+	+	
Wastepaper, batteries collection	+	+	+
Use of recyclable materials	+		
Tracking the level of CO2 footprint			
Expansion of pedestrian zones			
Educational activities			
Lectures, film screenings	+		
Excursions to recycling centers	+	+	
External events			
Participating in national and international conferences	+		

# Timeline

We decided to start from several events which are able to improve the sustainability of the Financial University.

# Conclusions

Universities in our country are not yet as advanced in the field of sustainable development as foreign ones.

We have identified the main criteria that must be followed in the process of implementation of the “green” principles.

We conducted an analysis and compared our university with the HSE and MIPT, taking into consideration the 4 criteria. Since we consider our project as a long-term one, we certainly hope for its distribution further than just at the university level .
