

Department of International Business at Metropolitan University Prague organises

7th International Scientific Conference

IFRS: GLOBAL RULES & LOCAL USE

- BEYOND THE NUMBERS

DATE

10–11 October 2019

VENUE

Metropolitan University Prague, Dubečská 900/10, Prague 10, Czech Republic

ABOUT THE CONFERENCE

Scholars, students and the public at large who wish to know more about bridging the gap between international accounting rules (IFRS) and local applications are invited to share their knowledge and experience at this event organised by the Metropolitan University Prague. Issues to be discussed involve finance, accounting, and management.

With the current trend towards accounting harmonisation, the aim of this conference is to focus on specific accounting differences and what lies behind them. Topics should be researched both theoretically and practically, focussing on practices in emerging markets and transitional economies.

The special guest speaker is Professor David Alexander, University of Birmingham, renowned expert in IFRS and international finance and accounting.

CONFERENCE TOPICS

Topics suitable for the conference include, but are not limited to:

- Specific issues related to incorporation of EU Accounting Directives into national accounting rules
- Valuation of companies in transitional markets
- Sustainability, environmental and integrated reporting
- Professional training of accountants in the IFRS era
- Historical perspectives on IFRS in different countries
- Relationship between tax and accounting
- Impact of IFRS on reporting and controlling
- Financial reporting for SMEs
- Nonfinancial reporting
- Impression management
- Corporate social responsibility
- Regional impact of international trade regulations
